

Figure S1: Uncertainty in the log base 10 of the relative entropies averaged over 10 independent samples of (A) reference simulations of M1 and (B) adaptive sampling of M1. Black lines are contours of equal amounts of data.

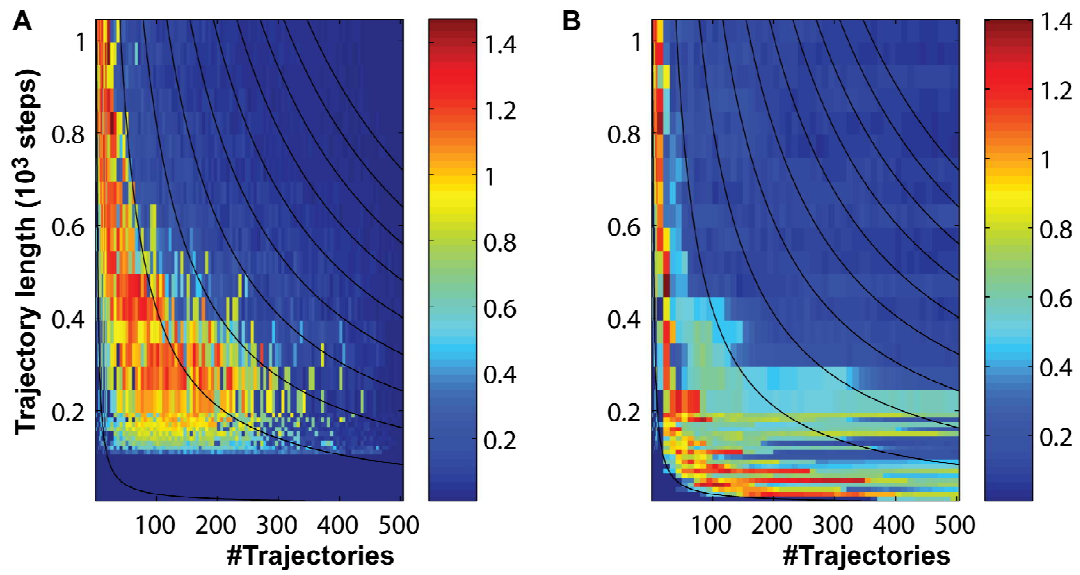

Figure S2: Uncertainty in the log base 10 of the relative entropies averaged over 10 independent samples of (A) reference simulations of M2 and (B) adaptive sampling of M2. Black lines are contours of equal amounts of data.
